BUILD KEY & EASY STEPS

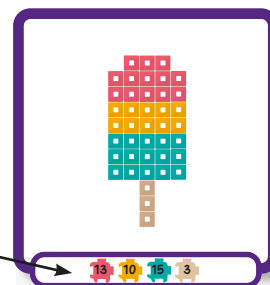

1

BUILD EACH PART !

Follow the build template for each design, to select the right number of BRIX and build up the design.

(Build guide found on the NEXT PAGE)

EXAMPLE BUILD TEMPLATE

2

CONNECT DESIGNS TOGETHER !

SIMSTIX PENDANTS: Thread Short Simstix Pendants onto bracelets to create charms or Thread Long Simstix Pendants onto necklaces for statement pieces.

CLASPS: Thread one side of the Cord through one side of opened Clasp and tie a knot to stop the thread from pulling out, repeat on the other side of Cord and tie to other Clasp. The Clasps can now be pushed together to lock necklace in place.

NECKLACES: Cut enough string to fit loosely around the neck with a little extra to tie the clasp at the end. Chose a build as the necklace pendant and slot the Simstix Pendant into the centre of the build to secure it. Thread the Cord into the top loop and finish by attaching the clasp.

THREADED BRACELETS: Cut enough string to fit around the wrist with a little extra to tie the clasp at the end. Thread the Cord through each Simbrix to fill the bracelet and finish by attaching the clasp.

Note: Cut the free end of thread as short as possible after tie the Knot.

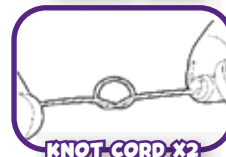

In this set the Brix in the box won't make all the templates at the same time. Choose which designs you want to ROCK
